

# Subject Index to Volume 25

## A

### Acetylcholine

- acid secretion and, gastric phase of, G747
- calcitonin gene-related peptide actions on, gastric antrum, G732
- electrical and mechanical effects, subregions of colon, G298
- GABA and, regulation of peristalsis, G690
- intracellular calcium mobilization and, parietal cells, G420
- release
  - colonic submucous neurons, chloride secretion and, G131
  - presynaptic modulation of, pancreas-tatin and, G113

ACH: see Acetylcholine

### Acid

- backdiffusion, gastric mucosal hyperemia and, G505
  - secretion, single-action agents and, G581
- ### Acidification
- basolateral membrane, oxynticopeptic cells (bullfrog), G44
  - vesicle, millionfold proton gradient, model, G30

### Acidosis

- function and morphology, gastric mucosa (frog), G405
- intracellular, prostaglandin effects, oxynticopeptic cells (bullfrog), G44

Acid secretory state, influence, chloride-base and sodium-hydrogen exchange, parietal cells, G81

Actin myosin, cross-bridge cycling, experimental colitis, colonic smooth muscle, G921

Acyl esters, ontogeny of, liver, intestine, and adipose tissue, G599

### Adenosine monophosphate, cyclic

- $\alpha_{2A}$ -receptors and, circular smooth muscle of proximal colon, G517
- inhibition, GLP-1-induced parietal cell function, G660
- peptide YY and neuropeptide Y, chief cells, stomach (guinea pig), G756
- phorbol ester modulation, chloride secretion, colonocytes, G249
- protein kinase dependent on, dephosphorylation of stimulated parietal cells, G763
- relaxation mediated by, distal circular muscle, colon, G159
- secretion development, permeabilized pancreas, fetus, G719
- somatostatin actions and, gastric smooth muscle cells, G432

Adenosine triphosphate, organic anion transport system dependent on, liver canalicular membranes, G629

Adenylate cyclase,  $\alpha_{2A}$ -receptors and, circular smooth muscle of proximal colon, G517

Adipose tissue, cholesterol acyltransferase in, G599

Adrenal cortex, pancreatic polypeptide receptors in, G532

Adrenal glands, pancreatic polypeptide receptors in, G532

Adrenal medulla, pancreatic polypeptide receptors in, G532

$\alpha_1$ -Adrenergic agonists, signal transduction pathways of, lacrimal gland, G1087

### Afferent nerves

- capsaicin-sensitive, colonic hyperemia and, G332
- colonic hyperemia and, G332
- visceral, gastric motility in duodenal distension, G603

Afferent pathway, evaluation of, rectum, G927

### Airway

- closure, during swallowing, G338
- protection, during belching, G621

$\beta$ -Alanine, chloride-dependent transport systems for, ileum, G609

### Albumin

- hepatic uptake dependent on, G191
- microvascular permeability, ileum, G572
- palmitate uptake and, hepatocyte suspensions, G883

Albumin-ligand complexes, facilitated dissociation of, hepatic uptake, G1127

### Allergy

- food, macromolecular transport, gastric mucosa, G1033
- mast cell distribution, gastric muscle, G477

Amiloride, sodium channel blockable by, sodium chloride-dependent expression, oocytes (chicken), G244

$\beta$ -Amino acids, transport, hepatocytes (skate), G445, G451

$\gamma$ -Aminobutyric acid, enteric, regulation of peristalsis, G690

Amino-oligopeptidase, intestinal, ontogeny of, G178

Amino-peptidase N, intestinal, ontogeny of, G178

Amygdala, central, CRF in, colonic motor response to stress, G137

### Amylase

- mRNA, stimulation of gastric inhibitory polypeptides and, G779
- pancreatic, dietary regulation of, transcriptional, G971
- release, streptolysin O permeabilized pancreatic acini, fetus, G719

Anal sphincter, internal relaxation, nitric oxide mediation of, G107

Anaphylaxis, antigen-induced, regulation of glycogenolysis and vasoconstriction during, liver, G868

Anesthesia, urethan, gastric phase of acid secretion, gastrin effects, G747

Angiotensin II, oxygen uptake and, liver lobule, G645

Anion channels, canalicular plasma membrane, liver, G1027

### Anions

- high-conductance channels, bile duct epithelial cells, G703
- organic, ATP-dependent transport, liver canalicular membranes, G629

Anthracene-9-carboxylic acid, osmotic swelling, jejunal crypt epithelial cells, G1021

Antigen, contraction induced by, colonic smooth muscle, G144

Antrum: see Gastric antrum

Apolipoprotein A-IV, mesenteric lymph, after lipid meal, satiation and, G1002

### AR42J cells

- growth, role of polyamines in glucocorticoid effects, G285
- membrane tyrosine phospholipase in, regulation by somatostatin, G1007
- regulated secretion, perturbation of, G257

ATP: see Adenosine triphosphate

Atropine, acid secretion and, gastric phase of, G747

Autocrine growth factor, pancreatic acinar cell growth and, G364

Autonomic nervous system, pancreatic polypeptide receptors in, G532

### Autoradiography

- glucose transporter site density, diet effects, crypt-villus axis, intestine, G1060
- inflammation, intestinal smooth muscle, G1041

Awake state, vagal effects, colonic motor activity (monkey), G231

## B

Barium, conductance, basolateral, antrum (frog), G651

Basolateral membrane vesicles, liver, 5-methyltetrahydrofolate transport in, G150

Belching, airway protection, upper esophageal sphincter opening and, G621

Bicarbonate, secretion, liver canalicular plasma membranes, G1027

### Bicarbonate ions

- exchange, prostaglandin stimulation of, oxynticopeptic cells (bullfrog), G44
- hypoxia effects, gastric mucosa (frog), G405

### Bile

- composition, gallbladder epithelium (guinea pig), G990
- flow, regulatory volume decrease stimulation of, liver, G806
- secretion
  - liver canalicular plasma membranes, G1027
  - paracellular permeability, hepatocytes, G1079
  - sulfated glycolithocholic acid, G267

### Bile acid

- N-acyl amides, enterohepatic circulation, G351
  - excretion, regulatory volume decrease stimulation of, liver, G806
  - intrinsic factor-cobalamin receptor, G210
  - sulfated, secretion of, G267
- Bile duct, epithelial cells, high-conductance anion channels, G703
- Blockade, nitric oxide, hyporeactivity to methoxamine in hypertension and, G996

- Blood flow:** *see also* Circulation; Microcirculation
- gastric
    - endothelin analogues and, G977
    - PAF and, leukocyte role in, G537
  - gastric mucosal
    - hepatic cirrhosis model, G727
    - hyperemia due to acid backdiffusion, G505
  - hepatic
    - measurement after severe hemorrhage, G92
    - measurement by laser Doppler flowmetry, G203
- Blood volume, changes, liver and spleen, ultrasonic crystal measurement, G934**
- Bombesin antagonist, gastrin response and, peptone stimulation, stomach, G685**
- Brain**
- CRF in, colonic motor response to stress, G137
  - noradrenergic systems, locus ceruleus modulation of myoelectric complex, G1121
- Brush-border enzyme, activities, regulation, small intestine, G1047**
- Brush-border membrane**
- bile acids, intrinsic factor-cobalamin receptor and, G210
  - intestinal, ontogeny of phosphate absorption, G847
- C**
- Calcitonin gene-related peptide, antral function and, G732**
- Calcium**
- actin myosin cross-bridge cycling and, experimental colitis, colon, G921
  - bile secretion, sulfated glycolithocholic acid cholestasis, G267
  - conductance, basolateral, antrum (frog), G651
  - cytosolic, vitamin D status effects, colon, G945
  - intracellular, oxygen uptake and, liver lobule, G645
  - intracellular concentration, gastric parietal cells, G420
  - peptide-stimulated CCK release and, perfused intestinal cells, G791
  - potassium channel transport dependent on, villus enterocytes, G369
  - pumping activity, mechanism of regulation, intestine (chick), G797
- Calcium channels, prostaglandin effects, small bowel motility, G488**
- Calcium currents, gastric smooth muscle cells, G859**
- Calcium ions, convective movement, gall-bladder epithelium (guinea pig), G990**
- Calcium pump: see Pump**
- cAMP: see Adenosine monophosphate, cyclic**
- Capillaries, microvascular permeability, ileum, G572**
- Capsaicin**
- gastric motility, in duodenal distension, G603
  - inhibition of delayed gastric emptying, abdominal surgery-induced, G616
- sensory afferent neurons sensitive to, gastric acid secretory responses and, G835
- Carbachol**
- gastric  $H_2$  receptors, gastric glands, G56
  - VIP interactions, colonic crypts, G940
- Carbamylcholine, protein kinase II, parietal cell secretion and, G118**
- Carbohydrates**
- dietary
    - glucose transporter site density and, intestinal crypt-villus axis, G1060, G1069
    - regulation of amylase, G971
- Carcinogenesis, xenobiotics metabolism, colonic crypts, G359**
- Cardiac output, severe hemorrhage, hepatic blood flow after, G92**
- Cathepsin B, lysosomal enzyme secretion and, pancreas, G439**
- CCK: see Cholecystokinin**
- Celiac ganglion, gastric mucosal hyperemia, hyperemia due to acid backdiffusion, G505**
- Central nervous system**
- CRF in, colonic motor response to stress, G137
  - esophageal peristaltic contractions, nicotine stimulation of, G567
- cGMP: see Guanosine monophosphate, cyclic**
- Chemiluminescence, reactive oxygen, release by hepatocytes on reoxygenation, G1015**
- Chenodeoxycholyglycine, bile acid N-acyl amides, enterohepatic circulation, G351**
- Chief cells**
- gastric, PYY receptors for (guinea pig), G756
  - pepsinogen release, CCK-A and CCK-B/gastrin receptor mediation of, G1113
  - small G proteins, stomach, G69
- Chloride**
- conductance, bile duct epithelial cells, G703
  - fluxes, fluid secretion relations, parotid gland, G393
  - secretion
    - acetylcholine release from colonic submucous neurons with, G131
    - phorbol ester stimulation of, colonic cell line, G249
- Chloride-36, efflux, jejunal crypt epithelial cells, G1021**
- Chloride-base, acid secretory state influence on, parietal cells, G81**
- Chloride-bicarbonate exchange**
- acid secretory state influence on, parietal cells, G81
  - anion channels, liver canalicular plasma membranes, G1027
  - fluid secretion and, parotid gland, G393
- Chloride ions, exchange, prostaglandin stimulation of, oxynticopeptic cells (bullfrog), G44**
- Chloroquine, lysosomal enzyme secretion and, pancreas, G439**
- Cholecystokinin**
- acinar cell growth, TGF- $\beta$ 1 inhibition of, G364
  - dietary protein-stimulated growth and, pancreas, G740
  - hormonal mechanisms, inhibition of gastric acid secretion, G165
  - intestinal microcirculatory changes and, during fat absorption, G399
  - regulated secretion, perturbation of, pancreatic acinar cells, G257
  - release
    - peptide-stimulated, calcium role in, intestinal cells, G791
    - sodium oleate and, G35
- Cholecystokinin octapeptide, pepsinogen release and, gastric glands, G1113**
- Cholera, fluid perfusion, cleansing and, colonic motor activity, G62**
- Cholesterol, metabolism, liver, intestine, and adipose tissue, G599**
- Cholesterol acyltransferase, ontogeny of, liver, intestine, and adipose tissue, G599**
- Cholinergic agonists, signal transduction pathways of, lacrimal gland, G1087**
- Chylomicron, transport, after lipid meal, satiation and, G1002**
- Chylomicronemia, postprandial, fat absorption and, G319**
- Cimetidine, acid secretion and, gastric phase of, G747**
- Circulation: see also Blood flow; Microcirculation**
- gastric, ethanol and endothelin-1 in, G785
  - hyperdynamic, hyporeactivity to methoxamine in hypertension and, G996
- Cirrhosis, hepatic, gastric mucosal blood flow in, model, G727**
- Cobalamin, transport, intrinsic factor, bile acids and, G210**
- Colipase, synthesis, gastric inhibitory polypeptide stimulation of, G779**
- Colitis, experimental, actin myosin cross-bridge cycling in colon, G921**
- Colon**
- actin myosin cross-bridge cycling, experimental colitis, G921
  - antigen-induced contraction, G144
  - crypts, carbachol and VIP interactions, G940
  - distal circular muscle, cAMP-mediated relaxation, G159
  - fluid flow in, short-chain fatty acid effects, G813
  - hyperemia, afferent nerves and, G332
  - membranes, vitamin D status effects on protein kinase C, G945
  - motilin receptors, erythromycin effects, G50
  - motility: *see* Motility
  - motor activity, vagal influences on, awake state (monkey), G231
  - motor alterations, CRH-induced, vasopressin mediation of, G427
  - NANC inhibition and rebound, nitric oxide and, G237
  - peristalsis, GABA regulation of, G690
  - proximal,  $\alpha_{2A}$ -adrenergic receptor action, G517
  - sodium channel, sodium chloride-dependent expression, oocytes (chicken), G244
  - subregions, motor patterns induced by ACh and substance P, G298
  - surface hydrophobicity, intestinal tract, G171
- Colonic crypts, biotransformation in, G359**
- Colonocytes, phorbol ester stimulation, chloride secretion, G249**

- Corticotropin-releasing factor  
inhibition of delayed gastric emptying,  
abdominal surgery-induced, G616  
paraventricular nucleus, gastric and co-  
lonic motor responses to stress,  
G137  
Corticotropin-releasing hormone, colonic  
motor alterations induced by, vaso-  
pressin mediation of, G427  
CRF: *see* Corticotropin-releasing factor  
CRH: *see* Corticotropin-releasing hormone  
Crypt-villus axis  
intestinal, glucose transporter site den-  
sity, diet effects, G1060, G1069  
small intestine, sucrose-isomaltase gene  
expression, G123  
Crystal dimension system, measurement of  
blood volume changes, liver and  
spleen, G934

## D

- Deoxyribonucleic acid  
inhibition of, liver regeneration and,  
G677  
synthesis  
after VMH lesions, vagus nerve role  
in, G483  
pancreatic acinar cell growth, G364  
Development: *see also* Growth  
gastrin  $\alpha$ -amidation in, stomach, G915  
intestinal amino-oligopeptidase, ontog-  
eny of, G178  
phosphate absorption, intestinal, G847  
postnatal, monosaccharide transport, in-  
testine (pig), G895  
secretion, permeabilized pancreas, fetus,  
G719  
substance P receptor, gastric smooth  
muscle, G291  
Diabetes, altered regulation of sucrose-iso-  
maltase, intestine, G983  
Diacylglycerol, vitamin D status effects,  
colonic membranes, G945  
Diamine oxidase, mercurial messenger, gut,  
G1  
Diarrhea  
experimental bacterial, L-glutamine  
fluxes in, G312  
fluid perfusion, cleansing and, colonic  
motor activity, G62  
Diet: *see* Feeding  
 $\alpha$ -Difluoromethylornithine, inhibition of  
increase in, liver regeneration and,  
G677  
Digestion  
altered regulation of sucrose-isomaltase,  
diabetes and, G983  
efficiency, diet shift effects (bird), G711  
1,25-Dihydroxycholecalciferol, vitamin D  
status effects, colonic membranes,  
G945  
1 $\alpha$ ,25-Dihydroxyvitamin D<sub>3</sub>: *see* Vitamin  
D<sub>3</sub>  
Disaccharidases, measurement of unstirred  
layer, jejunal, G593
- Edema, intestinal, lymph flow and pump  
behavior with, G199  
Electric patterns, transit of liquids and sol-  
ids, jejunal, G962  
Endocrine cells, antral, calcitonin gene-re-  
lated peptide and, G732  
Endothelin, receptors: *see* Receptors
- Endothelin-1, ethanol and, modulation of  
gastric mucosal integrity and, G785  
Endothelin analogues, potency, gastric vas-  
cular resistance, G977  
Endothelium-derived relaxing factor,  
blockade, hyporeactivity to methox-  
amine in hypertension and, G996  
Energy, taurine transport and, hepatocytes  
(skate), G451  
Enflurane, delayed gastric emptying, CRF  
and capsaicin effects, G616  
Enteric nerves  
neurotransmission, nitric oxide as a me-  
diator of, G379  
tachykinin release, adenosine A<sub>1</sub> recep-  
tor mediation of, G525  
Enteric nervous system  
acetylcholine release, chloride secretion  
and, colonic submucous neurons,  
G131  
electrophysiology, rectum (guinea pig),  
G545  
intestinal motility, before and after ovar-  
ectomy, G185  
patch-clamp recording, small intestine  
(guinea pig), G1074  
serotonin receptors, localization and  
identification of (guinea pig), G553  
Enteritis, *Yersinia enterocolitica*, intestinal  
longitudinal smooth muscle func-  
tion, G278  
Enterocytes  
altered regulation of sucrose-isomaltase,  
diabetes and, G983  
migration  
regulation, small intestine, G1047  
transporter induction, crypt-villus site  
of, intestine, G1069  
sucrose-isomaltase gene expression,  
small intestine, G123  
villus, large conductance potassium-se-  
lective channel, G369  
Epinephrine, oxygen uptake and, liver lob-  
ule, G645  
Epithelial cells  
bile duct, high-conductance anion chan-  
nels, G703  
jejunal crypt, potassium conductance, os-  
motic swelling and, G1021  
Erythromycin, motilin receptors and, co-  
lon, G50  
*Escherichia coli*, diarrheagenic, L-glutamine  
fluxes in, G312  
Esophageal sphincter, upper, opening, dur-  
ing belching, G621  
Esophagus  
lower sphincter, action profiles of nitric  
oxide (opossum), G840  
peristaltic contractions, nicotine and,  
G567  
Ethanol, intravascular, modulation of gas-  
tric mucosal integrity and, G785  
Ethyl alcohol, motor function and, stom-  
ach, G223  
Exocytosis  
cholinergic stimulation, mucus secretion,  
intestinal goblet cells, G327  
regulatory volume decrease effects, liver,  
G806
- Fat  
absorption  
essential fatty acid deficiency, G319  
intestinal microcirculatory changes,  
G399  
polyunsaturated, absorption, glutathione  
effects, small intestine, G99  
Fatty acids  
essential, deficiency, fat absorption and,  
G319  
omega-3, absorption, glutathione effects,  
small intestine, G99  
short-chain, contractile activity and fluid  
flow with, colon, G813  
transport  
albumin effects, hepatocyte suspen-  
sions, G883  
lymphatic, CCK inhibitor effects,  
G399  
Feedback, regulation, dietary protein-stim-  
ulated pancreatic growth, CCK ef-  
fects, G740  
Feeding  
acid secretion stimulated by, peptone,  
capsaicin-sensitive sensory afferent  
neurons and, G835  
dietary adaptation, regulation of entero-  
cytes, small intestine, G1047  
dietary protein-stimulated growth, CCK  
effects, pancreas, G740  
dietary regulation  
lactase mRNA, small intestine, G954  
pancreatic amylase, G971  
diet effects, glucose transporter site den-  
sity, intestinal crypt-villus axis,  
G1060  
diet shifts, digestive response to (bird),  
G711  
food allergy, macromolecular transport,  
gastric mucosa, G1033  
meal, acid response to, gastrin effects,  
G747  
sodium diet, amiloride-blockable sodium  
channel, oocytes (chicken), G244  
suppression, after lipid meal, satiation  
and, G1002  
Fetus, streptolysin O permeabilized pan-  
creatic acini, amylase release from,  
G719  
Flowmetry  
laser Doppler  
afferent nerves and colonic hyperemia,  
G332  
hepatic blood flow after hemorrhage,  
G92  
hepatic perfusion, G203  
Fluid  
flow, colon, short-chain fatty acid ef-  
fects, G813  
perfusion, colonic motility and, G62  
secretion, chloride fluxes and, parotid  
gland, G393  
Folic acid, transport, basolateral mem-  
brane vesicles, liver, G150  
N-Formyl-methionyl-leucyl-phenylalanine,  
inflammation induced by, intestinal  
lymph flow and pump behavior,  
G199  
Forskolin, hypoxia effects, gastric mucosa  
(frog), G405  
Fructose, transport, postnatal development  
of, intestine (pig), G895  
Frugivory, digestion efficiency and (bird),  
G711  
Fura-2, intracellular calcium mobilization  
and, parietal cells, G420

## F

- Fasting, complex intestinal motility and  
(chicken, pheasant, owl), G498

## G

- GABA: *see*  $\gamma$ -Aminobutyric acid
- Galactose, transport, postnatal development of, intestine (pig), G895
- Gallbladder  
epithelium, calcium ion movement across (guinea pig), G990  
motility: *see* Motility
- Gallstones, calcium ion movement, across gallbladder epithelium (guinea pig), G990
- Ganglion, celiac, gastric motility in duodenal distension, G603
- Gastric acid  
intracellular calcium mobilization and, parietal cells, G420  
secretion  
calcium ion/calmodulin-dependent protein kinase II effects, G118  
 $H_2$  receptors, G56  
intestinal acid inhibition of, G165  
medullary TRH effects, G216  
secretory response, capsaicin-sensitive sensory afferent neurons and, G835
- Gastric antrum  
basolateral membrane, potassium conductances in (frog), G651  
function, calcitonin gene-related peptide and, G732  
motor function, ethyl alcohol effects, G223
- Gastric cells, membranes, acid influx through, model, G30
- Gastric distension, interdigestive motility and, G1097
- Gastric emptying  
acceleration of, model of gastroparesis, G826  
delayed, abdominal surgery-induced, G616
- Gastric glands  
histamine  $H_2$  receptors, pharmacological characterization of, G56  
pepsinogen release, CCK-A and CCK-B/gastrin receptor mediation of, G1113
- Gastric mucosa  
acid secretion, single-action agents and, G581  
basolateral membrane, potassium conductances in (frog), G651  
function and morphology, hypoxia (frog), G405  
hyperemia, acid backdiffusion and, splanchnic nerve activity, G505  
integrity, intravascular ethanol modulation of, G785  
macromolecular transport by, G1033  
stress erosions, transglutaminase and protein cross-linking in, G818
- Gastrin  
acid secretion and, gastric phase of, G747  
 $\alpha$ -amidation, developing stomach, G915  
calcitonin gene-related peptide actions on, gastric antrum, G732  
intracellular calcium mobilization and, parietal cells, G420  
secretion, peptone-stimulated, stomach, G685
- Gastrointestinal hormone, transport, after lipid meal, satiation and, G1002
- Gastroparesis, acceleration of gastric emptying, model, G826
- Gene expression, sucrase-isomaltase, crypt-villus axis, small intestine, G123

- Glottis, protection, during belching, 621
- GLP-1: *see* Glucagon-like peptide 1
- Glucagon, electrical stimulation, model of gastroparesis, G826
- Glucagon-like peptide 1, parietal cell function induced by, pertussis toxin effects, G660
- Glucocorticoids, polyamines and, pancreatic acinar AR42J cell growth and, G285
- Glucose, transport, postnatal development of, intestine (pig), G895
- Glucose transporter  
site density  
dietary carbohydrate and, crypt-villus axis, G1069  
diet effects, intestinal crypt-villus axis, G1060
- L-Glutamine, fluxes, experimental bacterial diarrhea, G312
- $\gamma$ -Glutamyl transpeptidase, activities, regulation, small intestine, G1047
- Glutathione  
ATP-dependent organic anion transport, canalicular membrane, liver, G629  
mucosal, absorption of peroxidized lipids and, small intestine, G99
- Glycine, bile acid *N*-acyl amides, enterohepatic circulation, G351
- Glycogenolysis, hepatic, regulation during antigen-induced anaphylaxis, G868
- Glycolithocholic acid, sulfated, bile secretion of, G267
- Goblet cells  
intestinal, mucin secretion, cholinergic stimulation and, G327  
neurotensin and neuromedin N effects, mucin output, G470
- Gonadotropin-releasing hormone, intestinal motility, before and after ovariectomy, G185
- G proteins, small, stomach, G69
- Granulocytes, accumulation, postischemic intestine, G878
- Growth: *see also* Development  
pancreas, dietary protein-stimulated, CCK effects, G740  
tyrosine phosphatase and, AR42J cells, G1007
- Guanosine monophosphate, cyclic, neurotransmission, nitric oxide as a mediator of, G379
- Guanosine triphosphate, secretion development, permeabilized pancreas, fetus, G719
- Guanylate cyclase, neurotransmission, nitric oxide as a mediator of, G379
- Gut: *see* Intestine

## H

- Hemorrhage, severe, hepatic blood flow after, G92
- Hepatectomy, partial, regeneration, ornithine decarboxylase and polyamines in, G677
- Hepatic veins, large, vascular resistance, G14
- Hepatocytes  
couplets, hormonal regulation of paracellular permeability, G1079  
proliferation, vagus nerve role in DNA synthesis, after VMH lesions, G483

- release of reactive oxygen, reoxygenation, G1015
- suspensions of, palmitate uptake by, albumin effects, G883
- taurine transport (skate), G445, G451
- Hepatotoxicity, bile secretion, sulfated glycolithocholic acid cholestasis, G267
- Histamine  
acid secretion and, gastric phase of, G747  
contraction induced by, colonic smooth muscle, G144  
dephosphorylation and, stimulated parietal cells, G763  
intracellular calcium mobilization and, parietal cells, G420  
mercurial messenger, intestine, G1  
release, gastric glands, G56  
vascular resistance, large hepatic veins, G14
- Histamine methyltransferase, mercurial messenger, gut, G1
- Histidine decarboxylase, mercurial messenger, gut, G1
- Hormonal mechanisms, intestinal acid inhibition, gastric acid secretion, G165
- Hormonal regulation, paracellular permeability, hepatocyte couplets, G1079
- Hormones: *see also* specific hormone  
oxygen uptake and, periportal and pericentral region of liver lobule, G645
- 5-HT: *see* Serotonin
- Hydrogen, millionfold gradient, G30
- Hydrogen gas, clearance, afferent nerves and colonic hyperemia, G332
- Hydrolase, brush-border, diabetes and, intestine, G983
- Hydrophobicity, surface, intestinal tract, G171
- 6-Hydroxydopamine, migrating myoelectric complex, locus ceruleus modulation of, G1121
- 5-Hydroxytryptamine: *see* Serotonin
- Hyoid bone  
motion, during swallowing, G338  
protection, during belching, G621
- Hyperemia, colonic, afferent nerves and, G332
- Hyperplasia, inflammation and, growth of smooth muscle, small intestine, G1041
- Hypersensitivity, mast cell distribution, gastric muscle, G477
- Hypertension  
portal  
hyporeactivity to methoxamine and, G996  
splanchnic vascular resistance and somatostatin in, G274
- Hypertrophy, inflammation and, growth of smooth muscle, small intestine, G1041
- Hypothalamus  
lateral, CRF in, colonic motor response to stress, G137  
unitary responses, gastric vagal input from proximal stomach, G74  
ventromedial, lesions, DNA synthesis after, vagus nerve role in, G483
- Hypoxia  
function and morphology, gastric mucosa (frog), G405  
Kupffer cells, particle phagocytosis, G345  
nitrogen, liver, NMR studies of, G636

## I

- Ileum  
 cholinergic stimulation, mucus secretion, intestinal goblet cells, G327  
 permeability, microvascular, G572  
 smooth muscle, hyperplasia and hypertrophy, inflammation and, G1041  
 taurine and  $\beta$ -alanine transport, chloride-dependent systems for, G609  
 Immunoglobulin G, microvascular permeability, ileum, G572  
 Indanyloxyacetic acid, osmotic swelling, jejunal crypt epithelial cells, G1021  
 Indicator-dilution technique, thyroid hormone uptake, liver, G1104  
 Indocyanine green, measurement of hepatic blood flow, after severe hemorrhage, G92  
 Indomethacin  
 blockade, hyporeactivity to methoxamine in hypertension and, G996  
 leukocyte adhesion induced by, mesenteric venules, G903  
 Infection, *Yersinia enterocolitica*, intestinal longitudinal smooth muscle function, G279  
 Inflammation, cause of hyperplasia and hypertrophy, smooth muscle, small intestine, G1041  
 Inflammatory bowel disease  
 growth of smooth muscle and, small intestine, G1041  
 surface hydrophobicity, intestinal tract, G171  
 Inositol phosphates, vitamin D status effects, colonic membranes, G945  
 Intestinal acid, inhibition, gastric acid, G165  
 Intestinal cells, CCK release, peptide-stimulated, calcium role in, G791  
 Intestinal mucosa, postischemic, granulocyte accumulation, G878  
 Intestine  
 altered regulation of sucrase-isomaltase, diabetes and, G983  
 amino-oligopeptidases, ontogeny of, G171, G178  
 calcium-pumping activity, mechanism of regulation (chick), G797  
 cholesterol acyltransferase in, G599  
 crypt-villus axis, glucose transporter site density, diet effects, G1060, G1069  
 differential deconjugation, taurine and glycine bile acid *N*-acyl amides, G351  
 histamine, mercurial messenger, G1  
 lymph flow, f-Met-Leu-Phe-induced inflammation effects, G199  
 monosaccharide transport, postnatal development of (pig), G895  
 morphology, diet shift effects on digestion (bird), G711  
 pacing, electric and motor patterns of motility, G962  
 phosphate absorption, ontogeny of, G847  
 postischemic, granulocyte accumulation, G878  
 release of absorbed selenium, high hepatic extraction, G854  
 sodium channel, sodium chloride-dependent expression, oocytes (chicken), G244  
 surface hydrophobicity of, G171  
 taurine and  $\beta$ -alanine transport, chloride-dependent systems for, G609

- transport, calcium independent, villus enterocytes, G369  
 water absorption, measurement, G377  
 Intestine, large, myenteric neurons, electrophysiologically identified (guinea pig), G545  
 Intestine, small  
 crypt-villus axis, sucrase-isomaltase gene expression, G123  
 enterocyte migration rates, brush-border enzyme activities and, G1047  
 epithelial permeability, nitric oxide effects, G1138  
 lactase mRNA in, dietary control of, G954  
 longitudinal smooth muscle, function, *Yersinia enterocolitica* and, G278  
 myoelectric activity, prostaglandin effects, G488  
 patch-clamp recording, myenteric neurons (guinea pig), G1074  
 peroxidized lipids, absorption and lymphatic transport of, G99  
 smooth muscle, hyperplasia and hypertrophy, inflammation and, G1041  
 smooth muscle cells, endothelin receptors in, G308  
 unstirred layer, efficient luminal stirring, G593  
 Irritable bowel syndrome, adrenergic-serotonergic influences, G375

## J

- Jejunum  
 smooth muscle, hyperplasia and hypertrophy, inflammation and, G1041  
 transit of liquids and solids, electric and motor patterns with, G962  
 unstirred layer, efficient luminal stirring, G593  
 Junction, tight, hormonal regulation of paracellular permeability, G1079

## K

- Kupffer cells, activation, after hypoxia, reflow model, G345

## L

- Lacrimal gland, signal transduction pathways in, G1087  
 Lactase mRNA, dietary control of, small intestine, G954  
 Larynx, vestibule, closure during swallow, G338  
 Leukocytes  
 adherence, postischemic intestine, G878  
 adhesion, indomethacin-induced, mesenteric venules, G903  
 gastric microvascular actions and, PAF, G537  
 Leuprolide acetate, intestinal motility and, before and after ovariectomy, G185  
 Lipase, pancreatic, gastric inhibitory polypeptide stimulation of, G779  
 Lipids  
 biliary, essential fatty acid deficiency and, G319  
 meal, increased apolipoprotein A-IV after, satiation and, G1002  
 peroxidized, absorption and lymphatic transport, small intestine, G99  
 planar bilayers, anion channels in liver canalicular plasma membranes, G1027

- Lipoprotein, transport, essential fatty acid deficiency and, G319

## Liver

- albumin-dependent uptake, experiments for, model, G1127  
 basolateral membrane vesicles, 5-methyltetrahydrofolate transport in, G150  
 bile secretion, sulfated glycolithocholic acid cholestasis, G267  
 blood flow: see Blood flow  
 blood volume changes, ultrasonic crystal measurement of, G934  
 canalicular membranes, ATP-dependent organic anion transport system, G629  
 cells: see Hepatocytes  
 cholesterol acyltransferase in, G599  
 cirrhosis, gastric mucosal blood flow in, model, G727  
 exocytosis and bile flow, regulatory volume decrease and, G806  
 extraction, intestinal release of absorbed selenium, G854  
 glycogenolysis and vasoconstriction, regulation during antigen-induced anaphylaxis, G868  
 ischemic reperfused, neutrophil accumulation in, G669  
 lobule, periportal and pericentral regions, hormone effects on oxygen uptake, G645  
 nitrogen hypoxia, NMR studies of, G636  
 perfusion, measurement by laser Doppler flowmetry, G203  
 regeneration, ornithine decarboxylase, putrescine and, G677  
 taurine transport (skate), G445, G451  
 T<sub>3</sub> uptake, G1104  
 uptake, albumin-dependent, G191  
 vagus nerve, DNA synthesis after VMH lesions, G483  
 venous resistance responses, index of contractility, G510  
 Locus ceruleus, modulation, migrating myoelectric complex, G1121  
 Loxiglumide, intestinal microcirculatory changes and, during fat absorption, G399  
 Lumen, jejunal, efficient stirring, G593  
 Luminal acid, prostaglandin protection against, oxynticopeptic cells (bullfrog), G44  
 Luminal hormones, release, sodium oleate and, G35  
 Lymphatics, pump behavior, f-Met-Leu-Phe-induced inflammation effects, G199  
 Lysosomal enzyme, secretion, chloroquine and methylamine effects, pancreas, G439

## M

- Mast cells, distribution, intestinal muscle, nematode sensitization and, G477  
 Mastocytosis, intestinal muscle, nematode sensitization, G477  
 Membrane  
 basolateral, antrum, potassium conductances in (frog), G651  
 canalicular, liver, ATP-dependent organic anion transport system, G629  
 canalicular plasma, liver, anion channels in, G1027

- Mesenteric artery  
superior  
methoxamine in portal hypertension, G996  
perfusion, somatostatin and splanchnic vascular resistance, G274  
Metabolic system, dynamics of, G581  
Methoxamine, hyporeactivity to, portal hypertension, G996  
Methylamine, lysosomal enzyme secretion and, pancreas, G439  
Methyl palmitate, Kupffer cells, reperfusion and, after hypoxia, G345  
5-Methyltetrahydrofolate, transport, basolateral membrane vesicles, liver, G150  
f-Met-Leu-Phe: *see* N-Formyl-methionyl-leucyl-phenylalanine  
Microcirculation: *see also* Blood flow; Circulation  
hepatic  
after severe hemorrhage, G92  
measurement by laser Doppler flowmetry, G203  
intestinal changes, during fat absorption, G399  
Models  
acid influx, gastric cell membranes, G30  
albumin-dependent uptake, hepatic, G1127  
gastroparesis, acceleration of gastric emptying, G826  
hepatic cirrhosis, gastric mucosal blood flow, G727  
metabolic system, dynamics, G581  
reflow, Kupffer cells after hypoxia, G345  
Monosaccharide, transport, postnatal development of, intestine (pig), G895  
Motility  
antroduodenal, nitric oxide as NANC, G695  
colonic  
CRH-induced, vasopressin mediation of, G427  
fluid perfusion and cleansing effects, G62  
prostaglandin E<sub>2</sub> effects, G23  
vaginal influences on, awake state (monkey), G231  
gallbladder  
adrenergic-serotonergic influences, G375  
octreotide effects (prairie dog), G909  
gastric, duodenal distension effects, G603  
gastrointestinal  
ACh and substance P effects, G298  
erythromycin action on, G50  
locus ceruleus modulation of, G1121  
NANC inhibition and rebound in, G237  
nitric oxide as a mediator of, G379  
interdigestive, vagus-dependent disruption, gastric distension, G1097  
intestinal  
complex, fasting effects (chicken, pheasant, owl), G498  
leuprolide acetate effects, before and after ovariectomy, G185  
prostaglandin effects, G488  
jejunal, electric and motor patterns with, G962  
octreotide effects, sphincter of Oddi and gallbladder (prairie dog), G909  
stomach, ethyl alcohol effects, G223  
Motor complexes, migrating, fluid perfusion and cleansing, G62  
Motor patterns, transit of liquids and solids, jejunal, G962  
Motor responses, gastric and colonic, stress, CRF mediation of, G137  
Mucin  
output, neurotensin and neuromedin N effects, goblet cells, G470  
secretion, cholinergic stimulation of, intestinal goblet cells, G327  
Muscle  
circular, relaxation, GABA in peristalsis, G690  
intestinal, mast cell distribution in, nematode sensitization, G477  
longitudinal, colon, prostaglandin E<sub>2</sub> effects, G23  
Muscle, smooth  
anal sphincter, relaxation, nitric oxide and, G107  
circular,  $\alpha_{2A}$ -adrenergic receptor action, proximal colon, G517  
colonic  
actin myosin cross-bridge cycling, experimental colitis and, G921  
antigen-induced contraction, G144  
erythromycin action on, G50  
motor patterns induced by ACh and substance P, G298  
distal circular, colon, cAMP-mediated relaxation, G159  
gastric  
contraction, mast cell distribution, G477  
contraction, opioid receptors and (guinea pig), G461  
postnatal changes in substance P receptor, G291  
relaxation, somatostatin and, G432  
VIP stimulation of nitric oxide, G774  
intestinal longitudinal, function, *Yersinia enterocolitica* and, G278  
small intestine, hyperplasia and hypertrophy, inflammation and, G1041  
Muscle cells  
gastric smooth  
calcium and potassium currents, G859  
opioid receptors on, stomach (guinea pig), G461  
somatostatin actions, G432  
intestinal smooth, endothelin receptors in, G308  
smooth, intestinal, histamine in, G1  
VIP stimulation, nitric oxide, G774  
Myeloperoxidase  
granulocyte accumulation, postischemic intestine, G878  
neutrophil accumulation and, ischemic reperfused liver, G669  
Myenteric plexus, rectal neurons (guinea pig), G545  
Myoelectric activity  
gastric distension effects, interdigestive motility, G1097  
prostaglandin effects, small bowel, G488  
transit of liquids and solids, jejunal, G962  
N  
NANC: *see* Nonadrenergic, noncholinergic nerves; Transmitter, nonadrenergic noncholinergic  
Neural mechanisms, intestinal acid inhibition, gastric acid secretion, G165  
Neurokinin A, adenosine receptors and, enteric nerve, G525  
Neuromedin N, mucin output and, goblet cells, G470  
Neuromodulation, adenosine receptors and, enteric nerve, G525  
Neurons  
cholinergic  
antral, calcitonin gene-related peptide and, G732  
peptone-stimulated gastrin secretion and, G685  
colonic submucous, acetylcholine release, chloride secretion and, G131  
myenteric  
electrophysiologically identified, rectum (guinea pig), G545  
patch-clamp recording, small intestine (guinea pig), G1074  
sensory, delayed gastric emptying, surgery-induced, G616  
sensory afferent, capsaicin-sensitive, gastric acid secretory responses and, G835  
Neuropeptides, gastric acid secretory responses induced by, capsaicin-sensitive sensory afferent neurons and, G835  
Neuropeptide Y  
localization, adrenal glands, G532  
Y<sub>2</sub> receptors for, chief cells, stomach (guinea pig), G756  
Neurotensin, mucin output and, goblet cells, G470  
Neurotransmission, nonadrenergic noncholinergic, nitric oxide as a mediator of, G379  
Neurotransmitters  
nonadrenergic noncholinergic inhibitory, internal anal sphincter relaxation, G107  
release, nitric oxide and, gastric muscle cells, G774  
Neutrophils, accumulation, ischemic reperfused liver, G669  
Newborn, substance P receptor, gastric smooth muscle, G291  
Nicotine, peristaltic contractions and, esophageal, G567  
Nitric oxide  
action profiles, lower esophageal sphincter (opossum), G840  
as NANC transmitter, pylorus, G695  
blockade, hyporeactivity to methoxamine in hypertension and, G996  
colon, NANC inhibition and rebound in, G237  
epithelial permeability and, small intestine, G1138  
mediation, internal anal sphincter relaxation, G107  
nonadrenergic noncholinergic neurotransmission and, G379  
stimulation, VIP, muscle cells, G774  
S-Nitroso-L-cysteine, action profiles, lower esophageal sphincter (opossum), G840  
NMR: *see* Spectroscopy, nuclear magnetic resonance  
Nonadrenergic, noncholinergic nerves, inhibition and rebound, colon, nitric oxide and, G237  
Nonadrenergic noncholinergic innervation, action profiles, lower esophageal sphincter (opossum), G840

Nonsteroidal anti-inflammatory drugs, leukocyte adhesion induced by, mesenteric venules, G903

#### Norepinephrine

blood volume changes, liver and spleen, G934

hepatic venous resistance responses, index of contractility, G510

vascular resistance, large hepatic veins, G14

Nucleus ambiguus, TRH analogue injected into, gastric serotonin secretion and, G216

Nucleus tractus solitarius, unitary responses, gastric vagal input from proximal stomach, G74

#### Nutrients

##### absorption

diabetes and, intestine, G983

diet shift effects on digestion (bird), G711

#### O

Ocreotide, motility and, sphincter of Oddi and gallbladder (prairie dog), G909

Omeprazole, acid secretion and, gastric phase of, G747

Oocytes, sodium channel, sodium chloride-dependent expression of (chicken), G244

Opioid, receptors: *see* Receptors

Ornithine decarboxylase, inhibition of increase in, liver regeneration and, G677

Ovariectomy, leuprolide acetate effects before and after, intestinal motility, G185

#### Oxygen

reactive, release by hepatocytes on reoxygenation, G1015

uptake, hormone effects, liver lobule, G645

#### Oxynticopeptic cells

anion exchange, prostaglandin stimulation of (bullfrog), G44

gastric mucosal, hypoxia effects (frog), G405

#### P

PAF: *see* Platelet-activating factor

Palmitate, uptake, hepatocyte suspensions, albumin effects, G883

#### Pancreas

growth, dietary protein-stimulated, CCK effects, G740

lysosomal enzyme secretion, chloroquine and methylamine effects, G439

permeabilized, secretion development in, fetus, G719

polypeptide receptors, adrenal glands, G532

serotonin receptors, localization and identification of (guinea pig), G553

tumor, tyrosine phosphatase, AR42J cells, G1007

Pancreastatin, pancreatic enzyme secretion and, G113

#### Pancreatic acinar cells

##### growth

role of polyamines in glucocorticoid effects, G285

TGF- $\beta$ 1 effects, G364

lysosomal enzyme secretion, chloroquine and methylamine effects, G439

regulated secretion, perturbation of, G257

Pancreatic acini, streptolysin O permeabilized, amylase release from, fetus, G719

Pancreatic enzymes, secretion, pancreastatin effects, G113

Parasympathetic nerves, colonic motility and, awake state (monkey), G231

Paraventricular nucleus, CRF in, gastric and colonic motor responses to stress, G137

#### Parietal cells

acid secretory state, effect on chloride base and sodium-hydrogen exchange, G81

gastric, intracellular calcium mobilization in, G420

GLP-1- and histamine-induced function, pertussis toxin effects, G660

secretion, calcium ion/calmodulin-dependent protein kinase II in, G118

stimulated, cAMP-dependent protein kinase, dephosphorylation of, G763

Parotid gland, fluid secretion, chloride fluxes and, G393

Patch-clamp recording, calcium and potassium currents, gastric smooth muscle cells, G859

Pepsinogen, release, CCK-A and CCK-B/gastrin receptor mediation of, gastric glands, G1113

Peptide hormone, developing stomach, G915

#### Peptides: *see also* Polypeptides

CCK release stimulated by, calcium role in, intestinal cells, G791

gastrin-releasing, stomach, G685

opioid receptors, gastric muscle cells (guinea pig), G461

vasoactive intestinal carbachol interactions, colonic crypts, G940

GABA and, regulation of peristalsis, G690

somatostatin and, gastric smooth muscle cells, G432

stimulation of nitric oxide, muscle cells, G774

Peptide YY, Y<sub>2</sub> receptors for, chief cells, stomach (guinea pig), G756

#### Peptone

gastric acid secretory responses induced by, capsaicin-sensitive sensory afferent neurons and, G835

gastrin secretion stimulated by, stomach, G685

stimulation of acid output, gastrin effects, gastric phase, G747

#### Peristalsis

enteric GABA in, G690

esophageal contractions, nicotine and, G567

#### Permeability

calcium movement, across gallbladder epithelium (guinea pig), G990

epithelial, nitric oxide effects, small intestine, G1138

ileal microvascular, G572

macromolecular transport, gastric mucosa, G1033

paracellular, hormonal regulation of, hepatocyte couplets, G1079

vascular, PAF and, leukocyte role in, G537

#### Pertussis toxin

$\alpha$ <sub>2A</sub>-receptors and, circular smooth muscle of proximal colon, G517

inhibition, GLP-1-induced parietal cell function and, G660

pH, intracellular, acid secretory state effects, parietal cells, G81

Phentolamine, microvascular permeability, ileum, G572

Phlorizin, diet effects, intestinal crypt-villus axis, G1060, G1069

Phorbol esters, chloride secretion and, colonic cell line, G249

Phosphatase, activities, regulation, small intestine, G1047

Phosphate, absorption, intestinal, ontogeny of, G847

Phosphatidylcholine, vesicle acidification, millionfold proton gradient, G30

#### Platelet-activating factor

gastric microvascular actions, leukocyte role in, G537

glycogenolysis and vasoconstriction with, antigen-induced anaphylaxis, liver, G868

#### Polyamines

glucocorticoid effects and, pancreatic acinar AR42J cell growth, G285

inhibition of increase in, liver regeneration and, G677

protein cross-linking and, repair of mucosal stress erosions, G818

Polypeptides: *see also* Peptides

gastric inhibitory, pancreatic lipase and colipase synthesis, G779

#### pancreatic

chief cell PYY receptors (guinea pig), G756

localization, adrenal glands, G532

vasoactive intestinal, internal anal sphincter relaxation and, G107

Portal vein, hepatic, vascular resistance, G14

#### Potassium

##### conductance

basolateral, antrum (frog), G651

osmotic swelling and, jejunal crypt cells, G1021

##### Potassium channels

large conductance, enterocytes, G369

neurotransmission, nitric oxide as a mediator of, G379

Potassium currents, gastric smooth muscle cells, G859

#### Potentials

basolateral membrane, carbachol and VIP interactions, colonic crypts, G940

evoked, cerebral, afferent pathways, G927

inhibitory junction, nitric oxide and neurotransmission, G379

membrane, liver, ATP-dependent organic anion transport system, G629

spike, colon, prostaglandin E<sub>2</sub> effects, G23

#### Pressure

hepatic wedge, vascular resistance, G14

intragastic, gastric motility and, G603

perfusion, bile flow and bile acid, liver, G806

portal, venous resistance responses, G510

Prostacyclin, leukocyte adhesion induced by, mesenteric venules, G903

- Prostaglandins  
myoelectric activity and, small intestinal, G488  
stimulation of anion exchange, oxynticopeptic cells (bullfrog), G44
- Prostaglandin E<sub>2</sub>  
colonic motility and, G23  
parietal cell function and, G660
- Proteins  
cross-linking, repair of mucosal stress erosions, G818  
dietary, growth stimulated by, pancreas, CCK and, G740  
digestion, intestinal amino-oligopeptidase, G178  
phosphorylation, lacrimal gland, G1087  
sorting, lysosomal enzyme secretion and, pancreas, G439  
transport, intracellular, pancreatic acinar cells, G257
- Protein kinase, cAMP-dependent, dephosphorylation of, stimulated parietal cells, G763
- Protein kinase C  
chloride secretion and, colonic cell line, G249  
paracellular permeability and, hepatocyte couplets, G1079  
vitamin D status effects, colonic membranes, G945
- Protein kinase II, calcium ion/calmodulin-dependent, parietal cell secretion and, G118
- Pudendal nerve, stimulation, afferent nervous pathways, rectum, G927
- Pump  
calcium  
phosphorylated intermediate of, intestine (chick), G797  
relaxation mediated by, colon, G159  
lymphatic, f-Met-Leu-Phe-induced inflammation effects, G199
- Putrescine, inhibition of increase in, liver regeneration and, G677
- Pylorus, NANC transmitter, nitric oxide, G695

## R

- Raphe pallidus, TRH analogue injected into, gastric serotonin secretion and, G216
- ras p21, distribution, stomach, G69
- Receptors  
adenosine A<sub>1</sub>, tachykinin release and, enteric nerve endings, G525  
 $\alpha_{2A}$ -adrenergic, actions, circular muscle of proximal colon, G517  
albumin, palmitate uptake and, hepatocyte suspensions, G883  
endothelin, intestinal smooth muscle cells, G308  
histamine, mercurial messenger in the gut, G1  
histamine H<sub>3</sub>, pharmacological characterization, gastric glands, G56  
intrinsic factor-cobalamin, bile acids and, G210  
motilin, colonic, erythromycin effects, G50  
muscarinic, colonic submucous neurons, G131  
opioid, smooth muscle cells, stomach (guinea pig), G461  
serotonin, localization, pancreas (guinea pig), G553

- substance P, postnatal changes, gastric smooth muscle, G291  
Y<sub>2</sub>, chief cells, stomach (guinea pig), G756
- Rectum  
afferent nervous pathways from, G927  
myenteric neurons, electrophysiologically identified (guinea pig), G545
- Reoxygenation, release of reactive oxygen, hepatocytes, G1015
- Resistance  
distensible venous, index of contractility, G510  
splanchnic vascular, somatostatin and, portal hypertension, G274  
vascular  
gastric, endothelin analogues and, G977  
large hepatic veins, G14  
PAF and, leukocyte role in, G537
- Rhythms, oscillating complex, fasting effects, intestinal motility (chicken, pheasant, owl), G498
- Ribonucleic acid, inhibition of, liver regeneration and, G677
- Ribonucleic acid, messenger, stimulation of gastric inhibitory polypeptides and, G779
- Rubidium-86, efflux, jejunal crypt epithelial cells, G1021

## S

- Salivary gland, fluid secretion, chloride fluxes and, G393
- Scintigraphy, gastric motor function, ethyl alcohol effects, G223
- Secretin, release of, sodium oleate and, G35
- Secretory granules, transport, pancreatic acinar cells, G257
- Selenium, absorbed, intestinal release of, G854
- Serotonin  
contraction induced by, colonic smooth muscle, G144  
mast cell distribution, gastric muscle, G477  
receptors: *see* Receptors  
vagal gastric release, medullary TRH effects, G216
- Shunt, portacaval, intestinal release of absorbed selenium, G854
- Signal transduction,  $\alpha_1$ -adrenergic and cholinergic antagonists, lacrimal gland, G1087
- smg p25A, distribution, stomach, G69
- smg p21s, distribution, stomach, G69
- Sodium  
absorption, experimental bacterial diarrhea, G312  
chloride-dependent transport systems, ileum, G609  
transport, nitrogen hypoxia, liver, NMR studies, G636
- Sodium channels, sodium chloride-dependent expression of, oocytes (chicken), G244
- Sodium chloride, expression dependent on, sodium channel, oocytes (chicken), G244
- Sodium-hydrogen exchange  
acid secretory state influence on, parietal cells, G81  
vitamin D status effects, colonic membranes, G945

- Sodium nitroprusside, action profiles, lower esophageal sphincter (oposum), G840
- Sodium oleate, CCK and secretin release and, G35
- Sodium-potassium-chloride cotransport, fluid secretion and, parotid gland, G393
- Sodium taurocholate, bile acid and bile flow, liver, G806
- Somatostatin  
actions, gastric smooth muscle cells, G432  
calcitonin gene-related peptide actions on, gastric antrum, G732  
gastrin response and, peptone stimulation, stomach, G685  
hormonal mechanisms, inhibition of gastric acid secretion, G165  
parietal cell function and, G660  
regulation, membrane tyrosine phosphatase, AR42J cells, G1007  
splanchnic vascular resistance and, portal hypertension, G274
- Spectrophotometry  
organ reflectance, gastric mucosal integrity, ethanol effects, G785  
reflectance, afferent nerves and colonic hyperemia, G332
- Spectroscopy, magnetic resonance, nitrogen hypoxia, liver, G636
- Spermidine, inhibition of increase in, liver regeneration and, G677
- Sphincter of Oddi, motility, octreotide effects (prairie dog), G909
- Splanchnic nerve, activity, gastric mucosal hyperemia due to acid backdiffusion, G505
- Splanchnic sensory pathways, inhibition, gastric motility in duodenal distension, G603
- Spleen, blood volume changes, ultrasonic crystal measurement of, G934
- Stomach  
acceleration of gastric emptying, model of gastroparesis, G826  
chief cells, PYY receptors for (guinea pig), G756  
developing, gastrin  $\alpha$ -amidation in, G915  
gastrin secretion, peptone-stimulated, G685  
histamine, mercurial messenger, G1  
macromolecular transport by, G1033  
motor function, ethyl alcohol effects, G223  
proximal, gastric vagal input from, hypothalamic unitary responses, G74  
small G proteins in, G69  
smooth muscle cells, opioid receptors on (guinea pig), G461  
vascularly perfused, gastric mucosal integrity, ethanol effects, G785
- Stress  
emotional, CNS vasopressin mediation of, G427  
restraint, colonic motor response to, CRF effects, G137
- Substance P  
adenosine receptors and, enteric nerve, G525  
electrical and mechanical effects, subregions of colon, G298  
postnatal changes, gastric smooth muscle, G291  
Sucrase, activities, regulation, small intestine, G1047

- Sucrase-isomaltase expression  
altered regulation of, diabetes and, intestine, G983  
crypt-villus axis, small intestine, G123  
Sugars, transport, postnatal development of, intestine (pig), G895  
Sulfhydryl, dependence, taurine transport, hepatocytes (skate), G451  
Superoxide anions, action profiles, lower esophageal sphincter (opossum), G840  
Superoxide dismutase, neutrophil accumulation and, ischemic reperfused liver, G669  
Superoxide free radicals, neutrophil accumulation and, ischemic reperfused liver, G669  
Swallowing, closure during, larynx, G338  
Swelling, osmotic, potassium conductance and, jejunal crypt epithelial cells, G1021  
Sympathetic nerves  
colonic motility and, awake state (monkey), G231  
hepatic venous resistance responses, index of contractility, G510  
stimulation, liver and spleen, ultrasonic crystal measurement, G934  
Sympathetic nervous system, gastric mucosal hyperemia, hyperemia due to acid backdiffusion, G505

## T

- Tachykinins  
postnatal changes, gastric smooth muscle, G291  
release, adenosine A<sub>1</sub> receptor mediation of, enteric nerve endings, G525  
Taurine  
bile acid *N*-acyl amides, enterohepatic circulation, G351  
chloride-dependent transport systems for, ileum, G609  
transport, hepatocytes (skate), G445, G451

- 12-*O*-Tetradecanoylphorbol 13-acetate, secretion development, permeabilized pancreas, fetus, G719  
Tetrodotoxin, acetylcholine release, chloride secretion and, colonic submucous neurons, G131  
TGF- $\beta$ 1: *see* Transforming growth factor- $\beta$   
Thyroid hormones, uptake, hepatic, G1104  
Thyrotropin-releasing hormone analogue, medullary, vagal gastric serotonin release and, G216  
Transforming growth factor- $\beta$ , pancreatic acinar cell growth and, G364  
Transglutaminase  
mucosal stress erosions and, G818  
protein cross-linking and, repair of mucosal stress erosions, G818  
Transmitter, nonadrenergic noncholinergic, nitric oxide as, pylorus, G695  
TRH: *see* Thyrotropin-releasing hormone  
3,5,3'-Triiodothyronine, uptake, hepatic, G1104  
T<sub>3</sub>: *see* 3,5,3'-Triiodothyronine  
Tyrosine phosphatase, membrane, AR42J cells, regulation by somatostatin, G1007

## V

- Vagal sensory pathways, inhibition, gastric motility in duodenal distension, G603  
Vagotomy  
electrical stimulation, gastric emptying, model of gastroparesis, G826  
hepatic, after VMH lesions, DNA synthesis, G483  
medullary TRH, vagal gastric serotonin release and, G216  
Vagus nerve  
colonic motility and, awake state (monkey), G231  
disruption of interdigestive motility, gastric distension and, G1097  
gastric, input to hypothalamus, G74

- gastric mucosal hyperemia, hyperemia due to acid backdiffusion, G505  
hepatic, DNA synthesis after VMH lesions, G483  
Vasoconstriction  
endothelin analogues, potency of, gastric vascular resistance and, G977  
gastric, ethanol and endothelin-1 in, G785  
hepatic, regulation during antigen-induced anaphylaxis, G868  
Vasopressin, CNS, stress and, G427  
Venules, mesenteric, indomethacin-induced leukocyte adhesion, G903  
Verapamil, prostaglandin effects, small bowel motility, G488  
Videofluoroscopy, larynx closure, during swallowing, G338  
VIP: *see* Peptides, vasoactive intestinal  
Visceral afferents, rectum, G927  
Vitamin D, status, protein kinase C and, colonic membranes, G945  
Vitamin D<sub>3</sub>, 1 $\alpha$ ,25-dihydroxy-, calcium pumping activity and, intestine (chick), G797  
VMH: *see* Hypothalamus, ventromedial  
Volume  
regulation, taurine, hepatocytes (skate), G445, G451  
regulatory, decrease, bile flow and, liver, G806

## W

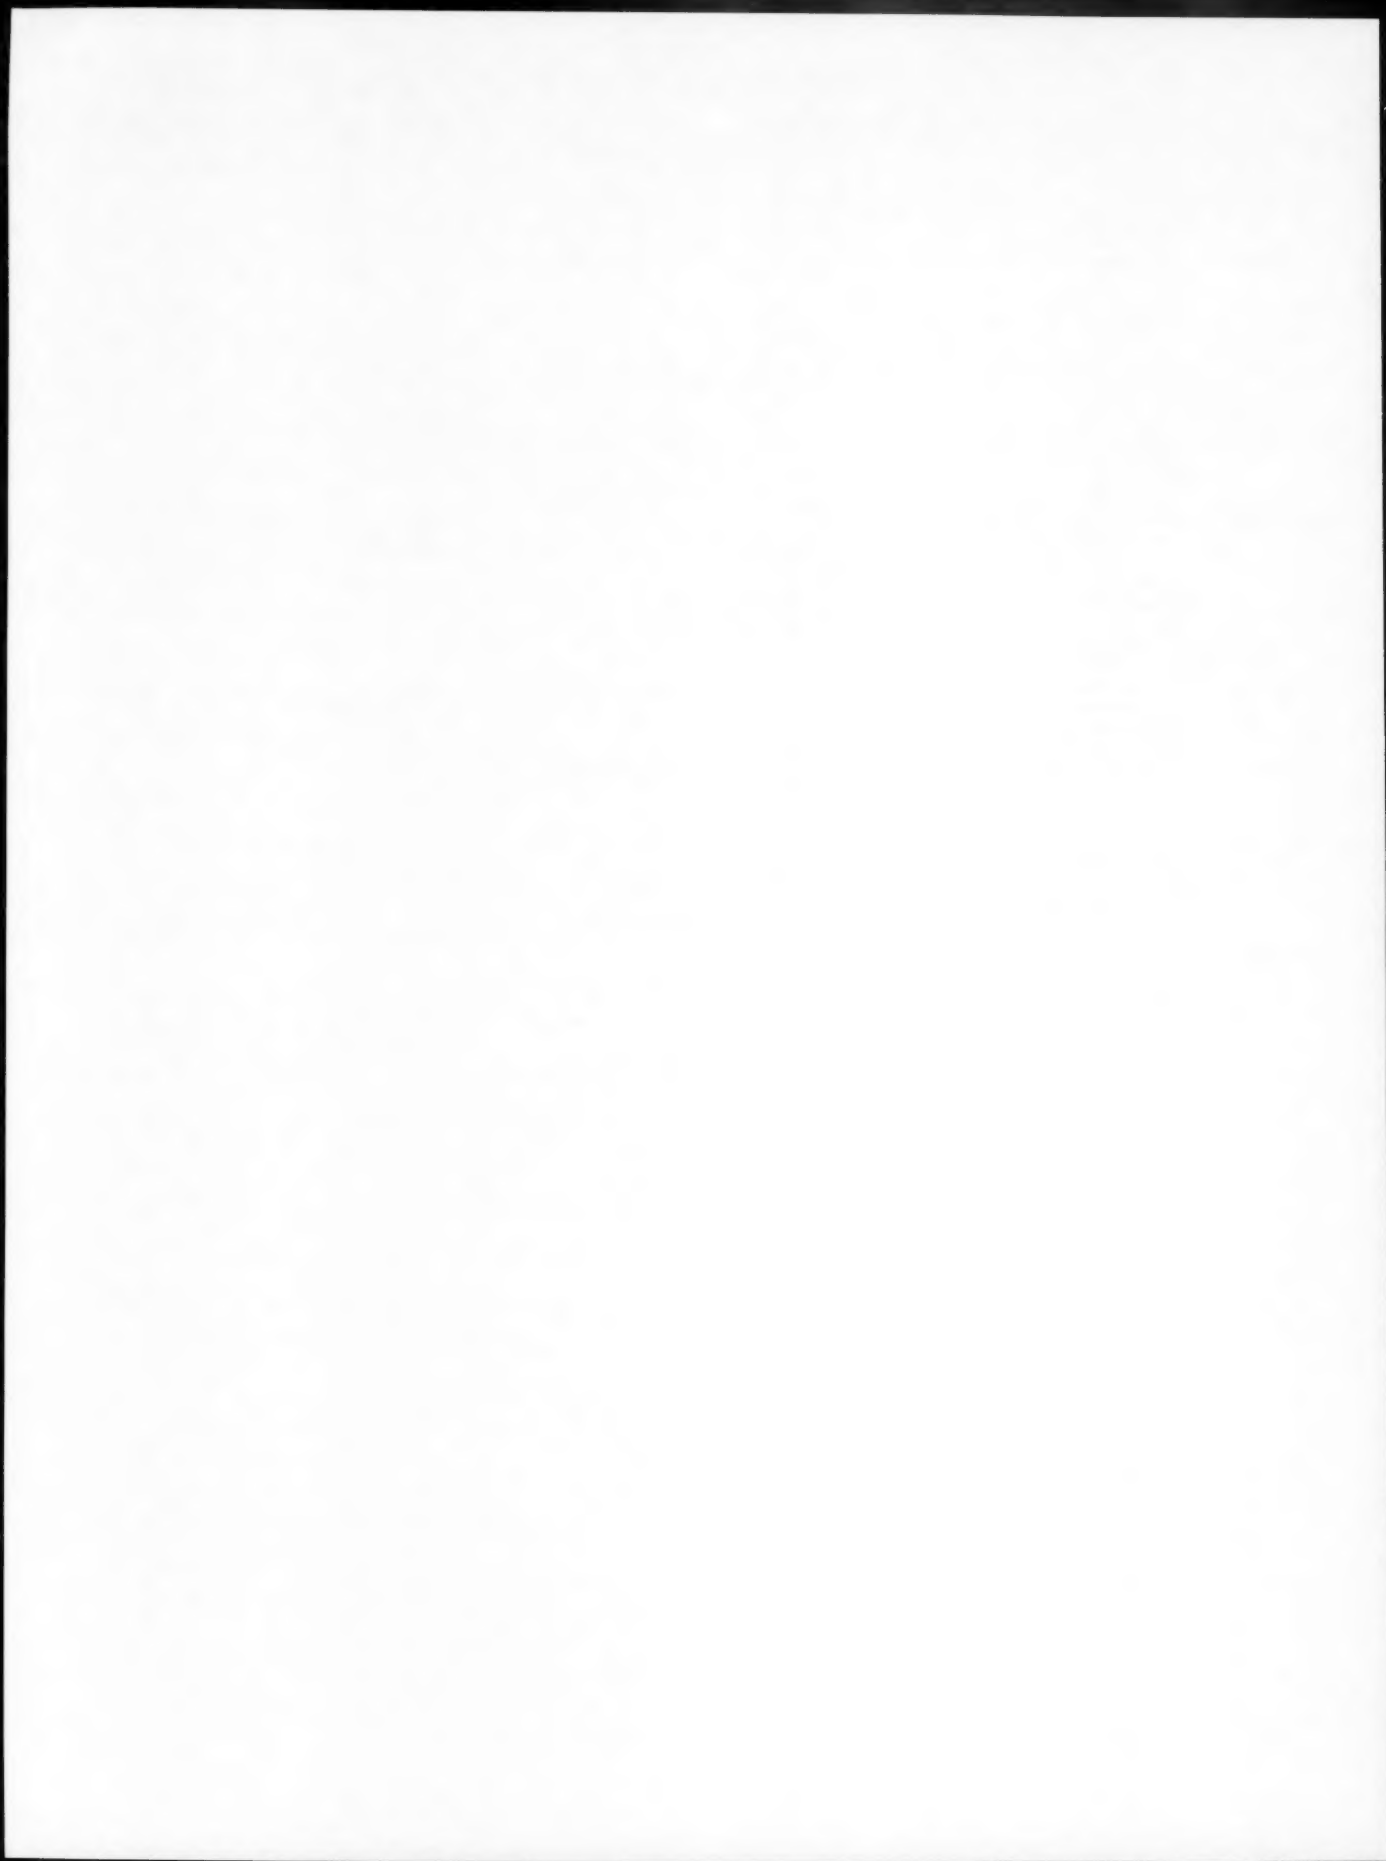

- Water, absorption, intestinal, G377

## X

- Xenobiotics, metabolism, colonic crypts, G359

## Z

- Zymogen granules, lysosomal enzyme secretion and, pancreas, G439
